

choco

choco install script

see (<https://stackoverflow.com/questions/48144104/powershell-script-to-install-chocolatey-and-a-list-of-packages>)

Run this script in powershell (checked in version 5):

```
powershell -executionpolicy bypass -File C:\Users\mypath\home_env_powershell_scr.ps1
```

Look up package:

(<https://community.chocolatey.org/packages?q=>)

To check installed choco package status':

```
choco outdated
```

Auto update all:

```
choco upgrade all --yes
```

List all installed packages (windows list):

```
""choco list -li""
```

```
""choco list --local-only"" Or:
```

```
""clist -l""
```
